

Frida Li

UX Researcher & Builder | Mixed-Methods | 0-1 Product Research | Bellevue, WA | [LinkedIn](#) | [Portfolio](#)

- **3+ years** of experience across Health Tech (Consumer Electronics), E-commerce, & Academia
- Product research across discovery, usability, & strategic initiatives
- Built user research infrastructure from scratch, including a user panel, a precise tag system for recruitment, synthetic users, and a Research Agent that streamlines user interview workflows

| Skill

Qualitative Methods	In-depth Interview, User Archetype, Journey Mapping, JTBD, Usability Study
Quantitative Methods	Survey, MaxDiff Analysis, Statistical Analysis (Descriptive & Inferential)
Skills	Research Design, Survey Design, Literature Reviews, Cross-functional Collaboration
Programming	R & Python (z-test, t-test, ANOVA, & Regression), SQL

| Experience

Feb. 2025 - Feb. 2026 Anker Innovations, User Experience Researcher/Consumer Insights

- **Defined** 0-1 Health Tech product direction by leading **generative** studies (N=10) and **evaluative** studies (N=200+), aligning PMs and Engineers on users and roadmap priorities
- Increased research response rates **16x** by building a 70k-user panel and 100+ recruitment tags, enabling precise sampling for 25 product teams
- Advised 20+ PM-led studies across Value Proposition, Industrial Design, and Concept Testing by shaping research plans, refining survey instruments, and guiding execution

Mar. - Dec. 2024 Human-Robot Interaction (HRI) Lab, RA

- Delivered real-time insights by building an R pipeline to automate 3 survey data analyses
- Guided the development of a rapport measurement scale in HRI by synthesizing 100+ studies

Apr. - Aug. 2023 TikTok, UX Researcher Intern

- Prioritized key drivers for TikTok Shop order growth by delivering insights on user purchasing motivations and creator expectations through **survey** (N=2.5k+) and comparative data analysis
- Increased results' reliability of a shopping experience survey by designing a **usability study** (N=20) that surfaced UI problems
- Improved platform trust by 13% by delivering insights from a survey (N=2k+), applying **t-tests** to identify trust drivers and informing PMs actions

Feb. - Dec. 2022 Australian National University, Graduate Researcher

- **Accepted** to UChicago with a 22k+ scholarship for original research applying correlation and multivariate regression to legislative behavior

| Education
